

New and Exclusive Tour

Spirit of Cambodia

Cambodia is now developing at a rapid pace and is shaking off the horrors of recent times.

At the forefront of this development are many NGO's (Non-Governmental Organizations), assisting local communities with sustainable projects from basic needs such as clean water provision and sanitation, through to education, and long-term environmental strategies.

Peace of Angkor Tours has long been a financial supporter of selected local NGO's and charities. This exclusive tour is intended to introduce you to a first-hand experience of current projects assisting the local community.

We start the tour near Siem Reap town, visiting **Grace House Community Centre**. Grace House combines schooling and vocational training to both children and adults from local villages. We now visit **The Trailblazer Foundation**. Trailblazer have been operating in Siem Reap province since 2005. We will look at their water-filter production facility and other sustainable agricultural projects that they have initiated.

We now take a pleasant 1 hour drive to **Banteay Srey Butterfly Centre**. Revenue from tourist admissions provides support for local poverty alleviation and conservation projects. The enclosure is South East Asia's largest butterfly exhibit and provides residents and tourists with an interactive and visual environment to learn about butterflies and support local communities. A number of families from remote villages are being employed to sustainably farm butterflies for the exhibit.

Following a visit to the **Landmine Museum** where we can see and understand the dangers of landmines and the massive efforts to clear them, we travel back towards Siem Reap and will visit the workshops of the **Orphans and Disabled Arts Association**.

We will see how the children of the **ODA** have developed art and drawing skills to such degree that their work is of significant commercial value. Income from their work supports them and the future growth of the orphanage.
